MANAGING RELATIONSHIPS with clients and prospects is crucial for any financial services firm in gaining a competitive edge. As investment clients and targets have become increasingly savvy, firms need a customer relationship system that facilitates the customer service that investors have come to expect.

That's why so many Private Equity and Venture Capital firms have turned to salesforce.com® to manage their customer-facing business processes.

Based on dozens of implementations at investment firms across the US, SalesLogistix has created the **Salesforce for Private Equity** JumpStart package, customizing the Salesforce.com platform to:

- ✓ Speed user adoption
- ✓ Streamline simplify data entry
- ✓ Track deals, referrers, syndicate members, funding sources, and executives
- ✓ Generate weekly “deal sheets,” deal-flow dashboards, and quarterly analytics

Designed for firms with fewer than 25 users, JumpStarts address the specific requirements of your firm. Our certified consultants will work with you to develop and tailor solutions that address your problems and accelerate your success. We’re sure that with our implementation packages, one is just right for you and your business.
